

WASTE TARP SYSTEMS

COVERING CANADA

Load Covering Solutions hydraulic tarp systems are all built tough & built to last. Reverse engineered, the ALC tarp system, designed for dump trucks & trailers, roll off containers, lugger boxes and walking floor trailers will save you money and down time over the long haul. Our unique roll up bar and spring applies tension to the tarp as the arms cover the load so the tarp stays tighter and reduces flapping in the wind. Because the arms are hydraulically operated there is no need for electric motors or insignificant springs, eliminating costly replacement every 2-3 years. We are confident that our customer's will be totally satisfied with the ALC tarp system – we **STAND UP TO OUR COMMITMENT.**
